

CHILD TRACKING SYSTEM

The Sarva Shiksha Abhiyan, Andhra Pradesh has introduced On-line system of child tracking. The concept of drop box provided in the UDISE is effectively used for child tracking and ratification of out of school children. The children who were not enrolled in the next class of a school were moved to drop box. Since the entire database is Aadhaar linked they were tracked to the place where they were newly enrolled. If they were not enrolled, such list was downloaded and provided to the CRPs and other field staff. Vigorous campaign was taken up followed by door to door survey. With this bold step the number of out of school children increased from 46744 to 65321.
