

E-Vidya Vahini

School Education & Literacy Department with the help of NIC has developed a system called E-Vidya Vahini for the purpose of Teacher, Student and School Management. It includes information on individual student, teacher and school. Master data from U-DISE and SDMS will be used as Master record for school, teacher and students. It will include modules such as :-

- Teacher's Attendance
- Teacher's Grievance redressal
- Teacher's Transfer and posting
- Inspection & Monitoring of schools by different officials with Geo-reference
- Student's Attendance
- Student wise learning tracking and CCE
- Child Entitlements
- Mid Day Meal

Application works on both on-line and off-line mode. Geo Fencing has been done 200 meter radius of the school. Each time the teacher mark their attendance or inspection report is sent through Mobile app, it gets the current Latitude and Longitude of that place and it will compare against the Latitude and Longitude of school to monitor the distance from the school the report has been send.

Both CRP/BRP and Head Master of school can send the reports separately via mobile app and both can be compared for the particular day. The different inspection modules have been provided for proper monitoring of school and student. It also track the day-to-day monitoring of schools by BRPs/CRPs and improvement taking place in respective schools.

Teacher can enter the students details including child wise examination results and the benefits given to them. Learning of individual child can be tracked using this application. It would help the teacher to monitor the student performance.

Aadhaar is also captured which will help in tracking the student if he/she left or join other school.
