DISTRIBUTION OF BICYCLES BY

CORPORATE SOCIAL RESPONSIBILITY

When I got transferred to this school in 2018 as Head Master I found that there are both facilities as well as challenges. I started discussing these with my teachers, community, village heads, youth, and officials to solve these challenges. During this period we realised that Transport is one major issue. Students used to miss the assembly session because of lack of proper transport from their hamlets, places. We realised that providing bicycles could address this challenge and we approached the management of First Solar Power Indian Pvt Ltd situated in the outskirts of Dhanwada village and requested them to donate Bicycles to the needy students. The management agreed to provide bicycles to the students in 2 phases. In the first phase they have provided 175 bicycles in March 2019 and in second phase 150 bicycles in July 2019.

Students and parents were very happy and it led to increased attendance percentage. An undertaking was taken from each student and parent who are provided with Bicycle, saying that they would attend the school regularly and maintain 95-100% attendance every month. After 10th class, the student has to return the bicycle to School which will be given to other needy student.
