

STEM programme at government school

The STEM (science, technology, engineering and math (STEM) programme started by the National Science and Technology Communication Council and the Department of Science and Technology, Government of India, was started at Government Senior Secondary School, Jundla, on Wednesday.

Karnal: The STEM (science, technology, engineering and math (STEM) programme started by the National Science and Technology Communication Council and the Department of Science and Technology, Government of India, was started at Government Senior Secondary School, Jundla, on Wednesday. Coordinator Rajpal Panchal said the programme had been started to create the concept of scientific approach, along with proper dissemination of the acquired knowledge of science and technology in the remote areas. Yogesh Bhatt, a resource person from Uttarakhand, made students aware about the checking of adulteration in food items through simple methods. Jitendra Bhatnagar, a resource person from Madhya Pradesh, shared a scientific interpretation of so-called miracles.
