

## DISTRICT SCORECARD

The Scorecard concept is launched to expedite the different activities of Govt. at field for better enhancement of education and educational environment of school going children. At first during 2018 Nov-Dec it is initiated manually to view the performance of districts and main challenges faced with respect to implementation of various interventions of the S&ME Department. In keeping view above all District Collectors/ District Education Officers/ District Project Coordinators were requested to prepare a specific strategy for improving the performance and overall quality and governance of the education system in their district. Districts were asked to select 3 annual and 3 monthly indicators, which the district should focus on in the coming months. As a result the availability of reliable data at the school level ensured that sustained development can be achieved across all the indicators resulting in holistic base. Every month each district scores a value and ranks an overall position in rank card and the topper with most improved one appreciated by authorities. It turned to online portal base from June 2019 onwards.

It is now released monthly on portal most probably during end of 1<sup>st</sup> week of succeeding month. Few categories are there following with certain flexible metrics and indicators as per requirement. By 5<sup>th</sup> of every month list of metrics/indicators value/score updated in portal at State Project Office and data collection started from different online/offline sources in a specific format. Data comparison, error checking, correction etc done within 1<sup>st</sup> week of succeeding month. Then data uploaded by 10<sup>th</sup> and scorecard released on same day after testing of rank logic.
